<i>Alternative Implementation Strategies</i>	Easy for business user to use (intuitive)	Query power and query sophistication	Performance, query speed	Expressive Power	System flexibility, agility	System Scalability	Global standard	Cost effective	Maintainability
XBRL technical syntax in a file system format	4	2	2	2	10	2	10	10	5
Business reporting semantics in file system format	10	4	2	8	10	2	10	10	5
XBRL technical syntax in relational database	2	3	7	2	4	7	10	8	4
Business reporting semantics in a relational database	8	8	7	6	4	7	9	8	4
XBRL technical syntax in a file multidimensional database	2	2	10	2	10	10	10	4	10
Business reporting semantics in multidimensional database	10	10	10	10	10	10	9	4	10
XBRL technical syntax in an RDF triple store	2	2	4	2	10	8	10	9	9
Business reporting semantics in RDF triple store	3	10	4	10	10	8	9	9	9
XBRL technical syntax in a NoSQL Database	5	4	5	9	10	10	10	9	9
Business reporting semantics in NoSQL Database	10	9	9	9	10	10	10	9	9
10 = Best possible outcome	Easy	Powerful	Fast	Expressive	Flexible	Scalable	Standard	Expensive	Hard to maintain
1 = Worst possible outcome	Hard	Un-sophisticated	Slow	Inexpressive	Inflexible	Not scalable	Proprietary	Inexpensive	Easy to maintain
